

How To Protect Your Identity Online

by Steve Pomeranz, CFP

- Make sure the site you're using has a privacy statement
- Always opt-in email, granting your email permission. You can always choose to opt-out.
- When banking or conducting brokerage transactions online, make sure you log-out when finished.
- Protect Social Security numbers and personal account numbers
- Don't leave list of usernames, passwords anywhere on computers
- Consider using software filters to:
 - Block cookies
 - Place firewalls
 - Install anonymity software
- Set-up email aliases. Any number of accounts that don't relate to each other
- Watch your kids
